## Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2 and 4-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0395300, Rigby et al. or Aurenius.

See the appropriate paragraph of the previous 2/11/05 final Office action for the teachings of these references.

EP 0395300, Rigby et al. and Aurenius are silent to the claimed "largest external dimension being less than 100 microns".

Miniaturization of components is advantageous to gain the advantages of lower cost of materials, less space is need to store the device, easier to handle/transport and permits a greater surface area to perform more tests.

The pertinent parts of MPEP 2144.04 (IV) are reproduced here below:

## A. Changes in Size/Proportion

In re Rose, 220 F.2d 459, 105 USPQ 237 (CCPA 1955) (Claims directed to a lumber package "of appreciable size and weight requiring handling by a lift truck" where held unpatentable over prior art lumber packages which could be lifted by hand because limitations relating to the size of the package were not sufficient to patentably distinguish over the prior art.); In re Rinehart, 531 F.2d 1048, 189 USPQ 143 (CCPA 1976) ("mere scaling up of a prior art process capable of being scaled up, if such were the case, would not establish patentability in a claim to an old process so scaled." 531 F.2d at 1053, 189 USPQ at 148.).

Application/Control Number: 09/787,195

Art Unit: 1743

In Gardner v. TEC Systems, Inc., 725 F.2d 1338, 220 USPQ 777 (Fed. Cir. 1984), cert. denied, 469 U.S. 830, 225 USPQ 232 (1984), the Federal Circuit held that, where the only difference between the prior art and the claims was a recitation of relative dimensions of the claimed device and a device having the claimed relative dimensions would not perform differently than the prior art device, the claimed device was not patentably distinct from the prior art device.

All of these decision state changes in size is not a patentable distinction over the prior art and would have been within the skill of the art.

It would have been within the skill of the art to modify EP 0395300, Rigby et al. or Aurenius such that the "largest external dimension being less than 100 microns" to gain the above advantages and in light of the above court decisions.

## Response to Arguments

Applicant's arguments filed 12/22/05 have been fully considered but they are not persuasive.

Applicants' state the cited prior art fails to teach the claimed support having external dimensions of less than 100 microns that has the ability of form an aqueous suspension. The Office maintains the external dimension of support are within the skill of the art as described above in the MPEP citation. The ability to form an aqueous suspension would have been an inherent characteristic based upon the size.

Applicants' state the instant invention is more than just scaling down the size of the device. In the absence of more probative evidence, the Office maintains "scaling down the size" has predictable, well known and expected results.

Art Unit: 1743

Applicants' make references to a declaration by Peter Swarbrick. Unfortunately, the Office cannot find this declaration in the file. Please supply the date of the filing of the declaration. If the declaration was filed, but is not scanned, Applicants' could supply a post card receipt and a new copy of the declaration for consideration.

Applicants' modifying the cited prior art to the claimed dimension would destroy the references. The Office is not convinced by these statements in the absence of more probative evidence.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A. Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Wednesday and Friday.

Application/Control Number: 09/787,195

Art Unit: 1743

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
